

MSCA *Postdoctoral Fellowships* *in a nutshell*

- The Postdoctoral Fellowships enables postdoctoral researchers with professional skills to boost their future careers through the implementation of an international, interdisciplinary and at best intersectoral personalised research project.
- **There two types:**
 - [European Postdoctoral Fellowships](#) allow Postdocs to pursue their project at a **host institution in an EU Member State** or at a host institution in a **Horizon Europe Associated Country (AC)**.
 - [Global Postdoctoral Fellowships](#) consist of an "**outgoing phase**" and thus a host institution in a non-European and non-Associated Country and a mandatory return phase to a host institution (beneficiary) based in an EU Member State or AC.
- The mobility rule applies to all fellows: they **may not have resided or worked in the host institution's country** for more than **12 months in the 36 months prior to the submission deadline** (for **Global Postdoctoral Fellowships**, this applies to the host institution of the "**outgoing phase**").
- **Funding :**
 - Fellows will be hired (**full-time**/exceptions may be considered) by the host (EU) with a **monthly salary consisting of a living allowance (4993.64€ gross salary)**, a **mobility allowance (600)**, and if eligible, a **family allowance (660)**. For the **project implementation** the host will receive and make available a **monthly lump sum of about 1000€** for the total project duration.
- **Eligibility:**
 - Researchers from all scientific fields with a doctoral degree not older than eight years (full-time FTE) at call deadline. Researchers who wish to reintegrate into research or the EU or (AC) can deduct their absent time.
 - **Global Postdoctoral Fellowship** applicants must be **nationals or long-term residents** of an **EU Member State** or an **(AC)**.
 - **European Postdoctoral Fellowship** applicants can be of any nationality.
- **Applications:**
 - Are to be submitted via the [Funding & Tender Opportunities Portal](#), following the call template structure. For help concerning technicalities or content of your proposal consult with HU's research [advisor Ravindranath Somaratne](#).
