

HU for future: Sustainability Theme Week

From 3 June to 5 June 2025, the theme week will take place under the motto “Teaching and Learning for Sustainability”. You are all invited to take part in workshops, panel discussions, guided tours, science slams and many other events! The diverse programme offers insights into how studying and teaching in all disciplines at the HU contributes to a sustainable and liveable society and encourages critical discussion about the responsible use of knowledge, decisions and methods.

Here are some highlights:

Exemplify. Follow up, 3 June, 15:30 to 19:30

This year’s teaching and learning week begins with the festive award ceremony for those excellent and sustainable courses you have nominated within the Award for Excellence in Teaching and Learning. The afternoon will open with a panel discussion entitled “How sustainable is teaching at HU?” and end with a fun and entertaining finale by the improvisation theatre group 'Improvisionäre'. As always, this will be a great opportunity to network and get inspired. Register quickly - places are limited!

Sustainable teaching. Sustainable learning, 4 June

From Open Educational Ressources to Education for Sustainable Development, from panel discussions to workshops, from students to the members of the Presidential Board, from individual courses to the structural level, from collective city cycling to guided walks: Together we will explore different aspects of sustainability at the HU throughout the day. For example, “Walk with us – re:distributing public spaces” starts at 10:00, from 13:00 you can work out “how to cope with global challenges?” in a workshop and at 15:00 there will be an online session on “Interdisciplinary sustainability research for students”. The full programme and registration options can be found at the link below.

World Climate Day, 5 June

The final event of our teaching and learning week is the Circle U. Climate Day, which takes place simultaneously at all nine partner universities across Europe - with innovative formats live at HU, online on the (solar) roof of Aarhus University, hybrid discussions in Louvain and a night hike through the Späth Arboretum.
