

Pandemic: Service directives come to a end - Maskrequirement not applicable

In recent weeks, Corona restrictions have increasingly been lifted nationwide and also in the state of Berlin. Only basic infection control measures apply. For Humboldt-Universität, this change in legal requirements means that, in particular, the mask requirement and all legal SARS-CoV-2-specific regulations cease to apply with effect from 4 June. All Corona service instructions ceased to be in force as of 4 June.

General instructions and recommendations on room hygiene etc. will be summarised in an updated framework hygiene plan, which will be submitted to the General Staff Council for co-determination.

Notwithstanding this, it is desirable that everyone continues to show solidarity and continue practised and proven infection control measures on their own responsibility. It is still recommended to wear a mask wherever the minimum distance cannot be maintained or several persons work together for long periods of time.
