

Dear fellow student,

Welcome to the survey "Structural accessibility at Humboldt-Universität zu Berlin". This questionnaire contains 26 questions. It will take about 20 minutes to complete. In order to improve structural accessibility at our university and to promote the equal participation of people with disabilities, it is important that you answer all questions completely and truthfully.

My request to you: If possible, work through the questionnaire to the end and do not stop before you have finished. If you are unable to answer some specific questions, please use the answer option "I cannot judge". You have the opportunity to continue the questionnaire at a later point in time in order to pay attention to special structural conditions at the university. The data cannot be assigned to you personally, is completely anonymous and will be treated in strict confidence.

Thank you for your participation!
