

## Climate protection at the HU: Mobility survey and registration for workshops

The HU climate protection management team, Wiebke Hampel and Kerrin van Bergen, is asking all staff and students to take part in a short, anonymous mobility survey and would like to thank everyone who has already taken part. The results of the survey are important for the HU's climate protection concept, which the climate protection managers are working on together with other actors and which will be developed in the course of the year. The aim is to make an important contribution to saving university greenhouse gas emissions by drawing up a climate protection concept and implementing climate protection measures.

With the help of the survey, university greenhouse gas emissions will be determined and evaluated. The aim is to design mobility strategies that are climate-friendly, efficient and practicable for HU members. For example, business trips or traveling to the campus will be examined. It takes about 15 minutes to take part in the survey. The survey will run until 2 June.

## Workshops in summer - participate and help shape

In addition to the results of the mobility survey, the two climate protection managers are interested in the knowledge of university members about climate neutrality and sustainability. They invite all Humboldtians to contribute their ideas in workshops on designing a climate-neutral university in teaching and learning, research and governance. In addition to discussing ideas and jointly developing climate protection measures, the team would like to exchange information on the status quo in the respective fields of action. The following workshops can be attended:

- Sustainability in Research - Shaping the Future Now.  
Date: June 16, 1 to 4:30 p.m.
- Education for Sustainable Development - Sustainable Approaches in Teaching  
Date: July 6, 1 p.m. to 4:30 p.m.
- Climate Neutral Governance Strategy  
Date: August 18, 1 to 4:30 p.m.
