

## **Final spurt: Survey on working conditions and health runs until July 24**

Those who have not yet had time to participate in the survey "Are you doing well at HU?" can still do so until July 24. Then the survey of the University Health Management (HGM) on working conditions and health at HU ends. With this survey, the HGM would like to learn more about how employees are doing in their everyday work. "We are pleased that we have already had almost 1,400 participants so far and would like to thank you very much for taking part," says Prof. Dr. Bernd Wolfarth, scientific project manager of the HGM.

### **Results and offers in the fall**

In the fall of this year, the HGM plans to present the results in the form of a health report and, on the basis of the survey, to design health-promoting offers according to the needs of the employees at the HU and to present them to the university public.

In addition to the survey, three online seminars are being held this week to help employees stay mentally and physically fit during the workday.
