Adlershof Campus –
An Overview

The two Faculties of Mathematics and Natural Sciences of Humboldt-Universität are located in Adlershof in the south-east of Berlin. With more than 6,000 students and approximately 1,000 academic and other university staff, the Campus is now the energetic and prosperous core of Berlin Adlershof, the “City of Science, Technology and Media”. The modern buildings provide excellent conditions for the Departments of Chemistry, Geography, Computer Science, Mathematics, Physics and Psychology. The existence of renowned non-university research institutions, businesses and companies in the immediate neighborhood stimulates research cooperation in various ways. Modern optics, molecular systems, mathematical physics and computational science are topics for interdisciplinary cooperation projects. A number of cooperation projects are established in the field of sustainability research. Responsibilities for two Collaborative Research Centers, five Research Training Groups and three Interdisciplinary Centres lie with Humboldt departments located at the Adlershof Campus. Humboldt students use the opportunity to establish contacts with research partners outside the University while on work placements or temporary jobs. In addition, the district of Adlershof is a most attractive location for startups originating from the University.

The focus of research at the Department of Chemistry is on the synthesis and characterization of functional materials, on catalysis, and on special chemical reaction studies with emphasis on synthetic methods and mechanistic studies. The research groups are interdisciplinary and include physicists, chemists, material scientists, and engineers. The main emphasis is on polymer chemistry and materials science. The Department of Chemistry is located on the Adlershof Campus and is also associated with the Berlin Brandenburg Institute forarticle 1.

The Department of Mathematics is among the largest departments at Humboldt-Universität zu Berlin and is characterized by a broad range of research activities in pure and applied mathematics. The department covers areas such as algebra, geometry, number theory, combinatorics, mathematical logic, and group theory. The department is also involved in interdisciplinary projects, including the analysis of complex systems in physics and biology. The department is located in the Nernst-Haus on Rudower Chaussee 25 and also has facilities in the Johann-von-Neumann-Haus.

Humboldt-Universität zu Berlin is a research university with a strong international orientation. It was founded in 1810 and is one of the largest universities in Europe. The university is located in the heart of Berlin, a city with a rich history and a vibrant cultural scene. The university has a strong focus on research and education and is known for its interdisciplinary approach and strong international collaborations. The university is supported by generous funding from the German government and other sources.

University Sport

Rudower Chaussee 13
12489 Berlin

Students are invited to join courses run by the University Sport Centre, where premises are located south of the Teltow Canal. A great variety of courses ranging from aerobics to yoga is offered by the Centre.

University Counselling Services

Campusfriedhof

Johann-von-Neumann-Haus

Rudower Chaussee 25

The General Counselling Centre and several other offices of the University administration held regular office hours at the Campus Office.

Spin-Off Zone

Wespenstraße 32, 12546 Berlin

Humboldt Innovation, a subsidiary of Humboldt-Universität, runs the spin-off zone at Adlershof Campus. In the future, building, Humboldt Innovation offers the platform as well as the creative environment, which have proven to be particularly fruitful in making a collection of innovative ideas into a successful business concept.
